

Interbuild 2004

Between 25th April and 29th April you can come and see us at Interbuild 2004 (hall 10 - stand 10L60), the United Kingdoms premier building products exhibition, where you can meet the expanding Patent Filtration team and be one of the first to see the revolutionary new Filtaire 2000.

A high performance compact solution

In response to a steady stream of customers feedback Patent Filtration are launching a new addition to their range of high performance air filtration systems.

The compact Filtaire 2000 has been developed to meet the needs of applications where size and aesthetics are of paramount importance. Designed to look similar to an audio speaker and measuring only 330 x 230 x 85mm the unit will sit unobtrusively in any environment whilst it's performance matches that of many much larger machines.

A unique filter system enables the Filtaire 2000 to eradicate pollutants down to 1/1000th of a Micron and the unit can clean up to 250 cubic feet of air per hour.

Ideal for many industrial, commercial and domestic applications the new Filtaire 2000 offers a truly versatile, compact solution where providing high quality, pollution free air is a priority.

For more detailed information on the performance of the new Filtaire 2000 call our customer support team on (01525) 384858.

Maintaining efficiency

All Filtaire units have been designed perform effectively over an extended period of time. However as with any air filtration system eventually filters need replacing. The easiest way to ensure you system is working to it's peak performance is to sign up to Patent Filtration's 'automatic filter replacement' service.

Then you will never have to remember to change a filter again...

it's all done for you.

Luke joins the team

Luke Donnebaum who joined the team on 1st February 2004 will be looking at a number of issues affecting provision of healthy indoor air in the workplace, especially passive smoking. He will also have primary responsibility for updating the companies website and developing new marketing strategies.
